The nephites & Lamanites were mixed decent— from Manasseh. through Lehi: from Ephraim through Ishmael; from Judah through Mulek & his colony, & perhaps through Joram.

In the first 116 pages of the manuscript of the translation of the B. of M. which were delivered to Martin Harris & were lost by him, it was made plain that Ishmael was a descendant of Ephraim. although these pages were lost. this information was given to the church by Joseph Smith.

We read in scripture that-
Prophecies were made concern-
-ing Ephraim that took.
